Biological waste

Yes please: Body parts, tissue and organs, anatomical preparations and histological incisions etcetera.

No thank you: Waste should not contain any sharp objects.

Handling:

Pack the waste in a black waste box. Fit the lid properly. Sealed waste boxes are not allowed to weigh more than 10 kg. Biological waste must be kept in cold storage.

Pack especially bulky waste in sufficiently large cartons with double, internal plastic bags. Individually seal the plastic bags, carefully using cable ties or equivalent. Tape the carton together to ensure desired stability.

Attach the label "Biological waste". Infected biological waste is to be marked with double labels, "Biological Waste" and "Infected Waste".

Material: Waste box, absorption cloth and labels are ordered by MediCarrier.

Huddinge: Send the waste box by way of the supply station (Försörjningstation) to the in-house recycling station (Miljöstation) S32.

Solna: Order pickup by the icon *transportbeställning* on the first page on Inuti. Or, call Servicecenter, tel. (585) 81 000.

New hospital building in Solna: Sealed waste boxes should be left on the AGV-cart in the recycling room

Only waste that has been packed and labelled in a correct manner will be collected. If the waste is refused, departmental staff is to be informed of the reason.
